**Regression, classification,
survival analysis and beyond**

Access \geq 200 ML algorithms

**Tune hyperparameters with state-of-the-art
algorithms like Bayesian optimization**

**Create complex pipelines and
computational graphs**

**Easily run your benchmarks on large-scale
clusters**

**Integrated with OpenML for reproducible
and shared experiments**

www.mlr-org.com

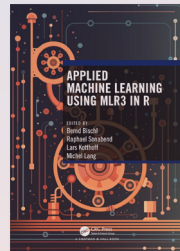

Who is this service for?

Data Scientists working in R

What problem does this service solve?

Provides an expressive grammar for ML experiments in R
